PROFESSIONAL SUMMARY

Final-year Computer Science student with strong foundation in cloud computing,infrastructure, and systems programming.I work hands-on with AWS Core Services.write automation scripts in python and administer Linux-based systems. I'm actively seeking entry level Python Developer, Cloud Engineer or DevOps Engineer roles where i can contribute to infrastructure reliability,
CI/CD pipelines, and cloud-native solutions.

TECHNICAL SKILLS

Programming Language : Python
Cloud: AWS (EC2, S3, IAM, VPC, CloudWatch, Lambda, SNS, SQS, DynamoDB)
Operating Systems: Linux (Ubuntu, Amazon Linux), Windows
Networking: TCP/IP, DNS, HTTP/HTTPS, Subnetting, Security Groups, Load Balancers
Database : SQL (MySQL)

PROJECT EXPERIENCE

Deep Learning–Driven 3D Neural Structure Analysis with PointNet++ for Alzheimer's Diagnosis

Technologies: Python, Deep Learning, PointNet++, Point Cloud

- Developed a deep learning model to analyze **3D neural structures for Alzheimer's disease detection**.
- Implemented **PointNet++ architecture** to process point cloud data.
- Improved accuracy in analyzing complex neural structures.
- Built preprocessing pipeline for **3D medical datasets**.

AWS Event-Driven Notification System

Technologies: AWS EC2, SNS, EventBridge, CloudWatch

- Built an automated system to **send email notifications for EC2 state changes**.
- Used **Amazon EventBridge rules** to detect EC2 instance events.
- Integrated **SNS for email alerts**.
- Improved system monitoring through **CloudWatch integration**.

EDUCATION

B.E in Computer Science and Engineering | CGPA : 8.39 (Till 7th Sem)
Anajalai Ammal Mahalingam Engineering College, Anna University | 2022 – 2026

CERTIFICATIONS

- AWS Cloud Practitioner (Pursuing)
- Linux Administration Basics
- Python
